

Coventry Case Study

Coventry is proud to be a Marmot City. The Marmot Partnership continues to bring together key stakeholders from across the system to provide an ongoing strategic focus on health inequalities. In 2023, the partnership produced the [Marmot Monitoring tool](#) to describe the city-wide programmes of work aligned to the Marmot principles, delivered by partner organisations across Coventry to tackle health inequalities. The tool contains information on the programmes of work and interventions delivered by partners that support our residents and businesses, building back fairer.

The [Guardian article](#) on our learning journey on how becoming a 'Marmot city' has underpinned our services, helping the council improve health equity².

Coventry City Council is one of ten local authorities across the UK that has been awarded funding in the first wave of the national a NIHR Health Determinants Research Collaboration (HDRC) Programme³. The [Coventry Health Determinants Research Collaboration](#) includes the University of Warwick, Coventry University, University College London Institute of Health Equity, University Hospital Coventry, and Warwickshire, the voluntary, community and social enterprise sector, and local communities. The HDRC is building on Coventry's track record of cross-sector engagement to support the council and partners including the Marmot Partnership to better use the evidence base around the wider determinants of health develop a new collaborative research culture and capability in the city.
