

Review of social determinants and the health divide in the WHO European Region: final report

Source materials used in case studies

Review of social determinants and the health divide in the WHO European Region: executive summary

Source materials used in case studies

Review chair

Michael Marmot

Report prepared by

UCL Institute of Health Equity

Abstract

The WHO European Region has seen remarkable health gains in populations that have experienced progressive improvements in the conditions in which people are born, grow, live and work. Inequities persist, however, both between and within countries. The review of social determinants and the health divide in the WHO European Region was commissioned to support the development of the new European policy framework for health and well-being, Health 2020. This resource provides references to the source materials used in case studies presented in the final report of the review.

All rights reserved. The Regional Office for Europe of the World Health Organization welcomes requests for permission to reproduce or translate its publications, in part or in full.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either express or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use. The views expressed by authors, editors, or expert groups do not necessarily represent the decisions or the stated policy of the World Health Organization.

The World Health Organization (WHO) is a specialized agency of the United Nations created in 1948 with the primary responsibility for international health matters and public health. The WHO Regional Office for Europe is one of six regional offices throughout the world, each with its own programme geared to the particular health conditions of the countries it serves.
