

‘Improving the health and wellbeing of the local workforce.’

How are we going to do this?

- Deliver comprehensive health checks at the workplace to two key employers

Initial focus

- Two key regional employers based in Spearhead Area.
- 70% of workforce resides in county

Why is this important?

- The Boorman review into NHS staff health and wellbeing indicates that organisations that prioritised staff health and well-being performed better
- Extending people's 'healthier' lives will help towards saving the 110 lives needed to be saved to bring county in line with the Warwickshire average.

Spreading key messages

In a recent survey of health check recipients

- 76% stated they will share key messages with family
- 48% stated they will share key messages with colleagues
- 45% stated they would share key messages with friends.
